Resettlement

Jessica Milgroom

Trees

- Tree use: makwakwa, xikutsi, nkanyi
- Resource claims
- Historical markers on the land, boundaries, women's claims to resources, extent of resident claims on the LNP landscape

Rebecca Witter

Makwakwa

Strychnos madagascariensis

Rebecca Witter

Rebecca Witter

Rebecca Witter

Xikutsi

Boscia albitrunca

Rebecca Witter

Nkanyi

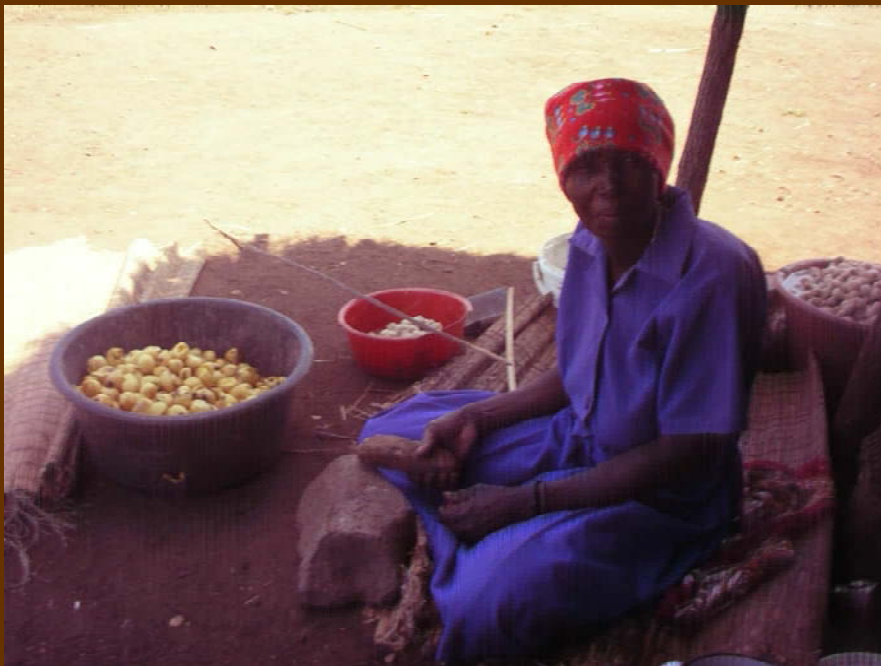

Sclerocarya birrea

Rebecca Witter

Questions on livelihoods in the context of resettlement:

- What are the aspects of current resource use and land tenure that enhance ecosystem health and sustainability and how do we, not just incorporate, but build from these? (*in reaction to AHEAD framing question 1*)
- Who will have access to resources in the destination locations?
- How will residents be compensated for resources that are spread out throughout the landscape in bounded plots of land in the destination locations?
