II-EMERGING CHALLENGES FOR LIVESTOCK AND WILDLIFE HEALTH WITHIN KAZA LANDSCAPE (1)

- NO RABIES MEDIATED DOGS CASES FROM JULY 2024 UP TO DATE
- IN 2024, **CASES OF CBPP** IN CUBANGO PROVINCE WERE REGISTERED
- **LSD** Cases in Cubango and Cunene provinces- samples collected and sent do CVL- WHK, Namibia, for diagnostic confirmation
- **CASES OF FMD- in cattle, WERE REPORTED IN MUKUKUTU, AREA, municipality of Cuangar-Cubango province, 7 Samples collected and sent to CVL- 01 serologically positive, no serotyping (the challenge is that the animals healed and looks like no viraemia, probably due to a long time. Probability of no more antibodies, because antibodies do flutuanace.**
- **PROBANG ALTERNATIVELY MUST BE TAKEN as another confirmatory option**
